3. Reason for the revision

The Bank's basic policy on profit distribution is to realize sustainable profit growth as a regional financial institution, maintain and improve its financial position, and pay progressive dividends.

The target dividend payout ratio is approximately 40% of net income attributable to owners of parent.

Based on this policy, for the six months ended September 30, 2026, the Bank has comprehensively assessed its recent business trends and decided to increase the interim dividend per share by ¥16.33 to ¥43 and, at the same time, the year-end dividend per share by ¥13 to ¥43, in order to respond to the ongoing support of its shareholders.

As a result, the annual dividend for the fiscal year ending March 31, 2027 has been increased by ¥29.33 to ¥86 per share.
